

REALGRAFFIX

Vinyl Fitting Instructions - Step-by-step Guide

1. Thoroughly clean the surface, ideally degreased. Surface must be really clean!
2. Hold decal against surface and familiarise yourself with the position that it should be in.
3. Place decal face down on a flat surface. Roll backing paper away from application tape gently and slowly keeping hand flat on backing paper. In the event of any letters sticking to tape roll hand back and apply pressure, pushing letters back down then continue.
4. Offer decal up to surface and when in correct position let decal touch surface.
5. Using something flat with a smooth edge, such as a bank card. Smooth into place from centre outwards, up and down.
6. Remove application tape to expose lettering by gently pulling it parallel with the surface.
